To whom it may concern

Reference Letter

Regarding: Mr Alexander G Robertson Johnson

It is my great pleasure to give this recommendation letter for Mr Alexander G Robertson Johnson in my capacity of Professor of Signal Processing and Control. I taught him course in Avionics and Autonomous Systems in the spring term in year four and a course on Flight Dynamics and Control in the third year of his studies in Sheffield.

Alexander did really well and impressed me with his broad skills in the areas of Computer Vision and programming. He demonstrated excellent time and project management skills, understanding and ability to implement image processing methods, to validate and to analyse well the results. He has a distinction result for the Industrial Training Program. During the academic year of his MEng studies, he was in touch with me on several occasions and we had the opportunity to have discussions about different methods. He has a broad knowledge in the area of intelligent systems, has the ability to learn quickly and can provide interesting engineering solutions. He can work both independently and as part of a team. He is hardworking, reliable and cooperative.

Hence, especially based on his strong motivation, enthusiasm and strong results in my course I fully support the application of Alexander for the position with your company. I believe that with his commitment, willingness to learn and creativity he will contribute actively to the activities of your company.

Sincerely yours,

Lyudmila Mihaylova, Professor of Signal Processing and Control
Department of Automatic Control and Systems Engineering
Mappin Street, Sheffield S1 3JD
University of Sheffield, United Kingdom
